

AMENDMENT TO THE SPECIFICATION

Please replace the title with the following:

"METHOD OF MAKING A MASCARA COSMETIC COMPOSITIONS
COMPRISING HETERO POLYMERS AND A POLYAMIDE POLYMER AND AT LEAST
ONE SOLID SUBSTANCE HAVING A MELTING POINT OF 45°C OR GREATER AND
METHOD OF USING SAME"

Please amend the Abstract as follows:

A method of making a mascara ~~Structured~~ compositions comprising ~~at least one~~
~~liquid fatty phase structured with~~ at least one structuring polymer chosen from polymers
of following formula (I):

in which n denotes a number of amide units, such that the number of ester groups
represents from 10% to 50% of the total number of ester and amide groups; R¹ is, in
each case, independently an alkyl or alkenyl group having at least 4 carbon atoms; R²
independently represents, in each case, a C₄ to C₄₂ hydrocarbonaceous group,
provided that 50% of the R² groups represent a C₃₀ to C₄₂ hydrocarbonaceous group;
R³ independently represents, in each case, an organic group provided with at least 2

carbon atoms, with hydrogen atoms and optionally with one or more oxygen or nitrogen atoms; and R⁴ independently represents, in each case, a hydrogen atom, a C₁ to C₁₀ alkyl group or a direct bond to R³ or another R⁴, so that the nitrogen atom to which both R³ and R⁴ are bonded forms part of a heterocyclic structure defined by R⁴-N-R³, with at least 50% of the R⁴ groups representing a hydrogen atom and at least one solid substance that has a melting point of about 45°C or greater. ~~This invention may be in the form of stable sticks and may give a non-migrating deposit when applied.~~

Please amend this application on page 1, line 1, by inserting the following new paragraph:

This is a continuation of Application No. 10/182,830, filed August 2, 2002, which is an entry into the national phase of PCT Application WO 02/47608, filed December 12, 2001, and PCT/US00/33596, filed December 12, 2000, all of which are incorporated herein by reference.
